DETAILED ACTION

1. This office action is in response to the after-final reply filed on 7/20/2009.
2. In the reply, the Applicant filed terminal disclaimers to US Pat. No. 6866654 and 6096011 which have been APPROVED.
3. Claims 42, 55-56, 58, 60, 70-73, 75-77 are pending for examination.

Allowable Subject Matter

4. Claims 42, 55-56, 58, 60, 70-73, 75-77 are allowed.
5. The following is an examiner's statement of reasons for allowance:
6. The subject matter of the independent claim could either not be found or was not suggested in the prior art of record. The prior art does not disclose or render obvious the combination as claimed specifically including an injector system having a fluid path set having a pressure isolation mechanism having a lumen, a pressure isolation port, a pressure transducer and a valve member biased to a normally open position permitting fluid communication between the lumen and the pressure isolation port and movable to a closed position when the fluid pressure in the lumen reaches a predetermined pressure level sufficient to overcome the biasing force of the biasing portion of the valve member and wherein when in the closed position the valve member is adapted to allow fluid communication between the inlet and the outlet of the lumen while preventing fluid communication between the lumen and the pressure isolation port in combination with the other elements of the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
